Sean Holleran is a Senior Lecturer in Chemical and Biomolecular Engineering at the University of Pennsylvania's School of Engineering and Applied Science. Dr. Holleran received his PhD in Chemical Engineering in 2007 from the University of Michigan while studying Brownian dynamics of polymer entanglements with Dr. Ronald Larson. His undergraduate degree (also in Chemical Engineering) was awarded by Cornell University in 1999. Dr. Holleran’s focus at Penn is on undergraduate engineering education - curriculum development, freshmen advising, outreach and enrichment activities. Dr. Holleran is also involved with the Penn Engineering Summer Academy in Applied Science and Technology (SAAST). He teaches the biotechnology program for exceptional high school students during the summer. Sean Holleran received the 2005 College of Engineering Distinguished Leadership Award from the University of Michigan and several teaching awards while at Michigan. His first child, Connor, was born in August.
